hayes.ryan95@gmail.com

Skills

-Python, HTML, CSS, Flask, C#, ASP.NET Core

Projects

-Blogz => Python, HTML, CSS, Flask, Jinja2, MySQL

This project was assigned as a part of the Launch Code's LC101 curriculum. We were to create a blog with login and signup functionality. Users are able to create blog posts and can view their own and others'.

-Cheese MVC Persistent => C#, ASP.NET Core, Entity Framework

This project was assigned as a part of the Launch Code's LC101 curriculum. As an introduction to object-orientated programing in C# and .NET Core, I made an application that creates cheese, category, and menu objects and relates them as need be.

-Liftoff Project => C#, ASP.NET Core, Entity Framework

For my project associated with Launch Code's Liftoff program, I have decided to create a site that keeps track of movie availability on varying streaming services. Users can add to and edit the database as information changes over time. This work is still in progress.

Work Experience

-Hardware Configuration Assistant, Carpenters Regional Council — 2018 – present

I install operating systems and software to computers for redistribution through the organization, and I wipe all sensitive information from computers as necessary, in accordance with HIPAA standards.

Education

Truman State University, Bachelor of Music – BM

Launch Code LC101 Development track

Launch Code Liftoff program

Piano Teacher, Nottelmann'
